Carbon Reduction Plan

Supplier name	**Coconnect Ltd**
Publication date	**03/11/2026**

Commitment to achieving net zero

Coconnect Ltd is committed to achieving net zero emissions by 2050.

Baseline emissions footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline year: 2025	
Additional details relating to the baseline emissions calculations:	

Scope 1

We do not have any long term rented / leased Petrol or Diesel vehicles.

We rent an office space within Novatech' s building and as such we do not have any control over gas or oil burned in boilers to heat factory or office.

Novatech report the usage.

We have reevaluated the boundaries of our reporting, because operational and financially we do not have any control we are now reporting this in scope 3.

Mobile Combustion - We do not have any long term rented / leased Petrol or Diesel vehicles.

Scope 2

Coconnect rent an office space within Novatech' s building and as such does not have any control over electricity purchased for the office or factory.

We have reevaluated the boundaries of our reporting, because operational and financially we do not have any control we are now reporting this in scope 3.

Coconnect currently have 1 company electric vehicles

There were no business miles used in 2025.

Scope 3

We have defined our Scope 3 emissions according to the categories determined in the GHG Protocol Standards.

1 Purchased Goods and Services - Not reporting currently

2 Capital Goods - We don't report on this as it is not applicable

3 Fuel and energy related activities - Included in Category 8

4 Upstream Transportation and Distribution

- Total Inbound Deliveries: 34 orders
- Estimated Average Distance: 180 miles per order
- Total Estimated Distance: 6,120 miles
- Total Carbon Emissions: 2,717.3 kg CO_2e (2.72 tCO_2e)

5 Waste - Reported Leased Assets

6 Business Survey - There was no business travel

7 Employee Commuting

- Total Annual Commuting Distance: 12,981 miles
- Total Annual Carbon Emissions: 2,870.5 kg CO_2e (2.87 tCO_2e)

8 Upstream Leased Assets

• Total Emissions from Upstream Leased Assets	kgCO2e
• 2025	653.7371 (0.6537371 tCO_2e)

9 Downstream Transportation and Distribution

- Estimated Average Distance:
  180 miles per order (calculated as the midpoint between 15 and 345 miles)
- Total Dispatches: 119 orders
- Total Estimated Distance: 21,420 miles
- Total Carbon Emissions: 9,510.5 kg CO_2e (9.51 tCO_2e)

10 Processing of sold products - Not reporting currently

11 Use of Sold Products - Not reporting currently

12 End of Life Treatment of Sold Products - Not reporting currently

13 Downstreamed Leased Assets - Not reporting currently

14 Franchise - Not Relevant

15 Investments - Not Relevant

Baseline year emissions:	
Emissions	Total (tCO2e)
Scope 1	0
Scope 2	0
Scope 3 (included sources)	15.10
Total emissions	15.10

Current emissions reporting

Reporting year: 2025	
Emissions	TOTAL (tCO2e)
Scope 1	0
Scope 2	0
Scope 3 (included sources)	15.10
Total emissions	15.10

Emissions reduction targets

In order to continue our progress to achieving net zero, we have adopted the following carbon reduction targets.

Because Coconnect operates within a co-located facility and we do not control the physical premises or direct energy contracts, our Scope 1 and Scope 2 emissions are negligible.

Therefore, our primary reduction strategy targets our Scope 3 emissions, specifically focusing on supplier engagement and employee habits.

As a fast-growing small business, we anticipate that our absolute Scope 3 footprint may initially increase in line with our annual turnover and business activity.

We aim to reduce our carbon emissions by 10% by 2030, measured against our 2025 baseline.

Carbon reduction projects

Completed carbon reduction initiatives

With our base line being 2025 we are not reporting a reduction.

Since 2019 our premises owners have:

- Replaced lighting with energy efficient LED bulbs,
- Installed motion sensors for lighting in infrequently occupied areas,
- Provided a cycle to work scheme for all employees, and invested in bike storage and changing / showering facilities to encourage employees to use sustainable transport methods.
- Installed solar panels on roof
- Eliminated gas from the building

Future carbon reduction initiatives

In the future we hope to implement further measures such as:

Scope 3

Category 1, 4, 9
Improve data collection with primary data collected from our supply chain. Assist suppliers in providing necessary information to determine and decrease emissions.

Category 7
Employee commuting Continue to look for ways to promote and incentivise sustainable transport to work.

Categories 11, 10, 12, 13
Future opportunities - Calculate our emissions from these categories to understand the impact and determine reduction opportunities.

Declaration and sign off

This Carbon Reduction Plan has been completed in accordance with PPN 006 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard[13] and uses the appropriate government emission conversion factors for greenhouse gas company reporting.[14]

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements (where required), and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard.[15]

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

Signed on behalf of the supplier:
